Mobile : +91 84694 28342

## EDUCATION

- **Parul Institute of Engineering and Technology** Vadodara, India  
*Master of Computer Applications; CGPA: 8.88* *July 2024 - July 2026*
- **Veer Narmad South Gujarat University** Surat, India  
*Bachelor of Computer Application; CGPA: 7.59* *June 2021 - June 2024*

## PROGRAMMING SKILLS

**Languages:** Python, Java, PHP, SQL  
**Frameworks:** Django, Django REST Framework (DRF), Flask  
**Frontend:** HTML5, CSS3, JavaScript, Tailwind CSS, SortableJS  
**Databases:** MySQL, SQLite, MongoDB  
**Tools & Platforms:** Git, GitHub, Power BI, Docker  
**Concepts:** OOP, System Design, RBAC, API Design  
**AI/ML:** Random Forest, LightGBM, Predictive Analytics

## EXPERIENCE

- **AccioJob Pvt. Ltd.** Jan 2026 – Mar 2026  
*Software Development Intern* *On-site (Parul University Campus)*
  - Developed and optimized backend functionalities using Python, Django, and Django REST Framework (DRF), improving API response efficiency by 15 - 20%.
  - Designed and implemented RESTful APIs, reducing frontend-backend data latency by 15%.
  - Collaborated on real-world application modules, improving code maintainability and reducing future development effort by 15%.
  - Used Git and GitHub for version control, improving team collaboration and reducing code conflicts by 10 - 15%.

## PROJECTS

- **MedQueue AI – Real-Time Hospital Queue Management System** Jan 2026 - Apr 2026  
*Django, Django REST Framework, MySQL, MongoDB, Redis, WebSockets, Machine Learning* [LINK](#)
  - Developed a scalable **AI-powered queue management system** using **Django and DRF**, reducing **patient waiting time** by 40–50%.
  - Implemented **real-time queue updates** using **WebSockets and Redis**, enabling **live synchronization** across users without page refresh.
  - Integrated **Machine Learning models (Random Forest, LightGBM)** to predict **waiting time** and optimize **hospital workflow efficiency**.
- **PortfolioCraft – AI Powered Portfolio Builder** Jul 2025 - Oct 2025  
*Flask, Python, SQLite, Google Gemini API* [LINK](#)
  - **Engineered a Flask-based backend** with modular Python services for PDF parsing, Gemini AI extraction, and portfolio generation.
  - Developed a responsive **drag-and-drop editor** using SortableJS and Tailwind CSS, **enabling real-time** section reordering and **reducing editing time by 40%**.
  - **Integrated REST-style endpoints** enabling dynamic preview updates and seamless front-end communication.
- **BharatSuraksha.com** Oct 2023 - Feb 2024  
*PHP, MySQL, JavaScript, Bootstrap* [LINK](#)
  - **Developed a scalable Crime Management System** with online FIR submission, role-based workflows, and real-time status tracking across multiple modules.
  - Implemented **secure role-based authentication** and optimized SQL schema, improving query performance by **30%** and reducing page load time.

## CERTIFICATIONS

Data Science using Python (SWAYAM MHRD), Software Development (LinkedIn), Power BI (Microsoft)
